

south pole group

Unlock the full business potential of sustainability for your organisation

south pole group helps you turn the challenges posed by climate change into business opportunities. We facilitate global cooperation between partners in sustainability domains. Our team of experts focuses on climate change, renewable energy, forests and land use, water, and sustainable cities and buildings.

A business opportunity

Climate change represents a serious threat to the wellbeing of our planet and our society as a whole. It exerts significant influence on the operations of organisations. Not addressing it poses a short-term risk and may lead to substantial consequences in the medium to long term. Business opportunities exist for companies that face this challenge by developing effective solutions. Addressing climate change is a key criterion for ensuring continued success in the future.

Our expertise

Climate change · Forests and Land Use · Water
Sustainable Cities and Buildings
Renewable Energy and Energy Efficiency

Solution

south pole group provides solutions for a sustainable society and economy that positively impact our climate, ecosystems and communities. Our activities are defined by the „sustainability value chain“ consisting of the following 4 steps:

Understand We measure and verify sustainability impacts of companies, their supply chains, products, services, investments, buildings as well as government policies and cities.

Design We provide powerful and effective corporate sustainability strategies as well as policy advice for low-carbon growth. Our expertise covers climate change, energy, forestry, agriculture, water and the built environment.

Act We enable corporate and public clients to take sustainability action. We provide high-quality certificates for carbon neutrality, green power, energy efficiency as well as green supply chain solutions.

Finance We provide fund advisory, due diligence services, climate-smart investment advisory and engage in Public Private Partnerships in order to leverage sustainability finance.

Global team

We are a global sustainability solutions provider. Our global team of over 130 enthusiastic sustainability professionals from over 20 different nationalities spans 6 continents.

Market-driven focus based on client needs

Proven impact

Since 2006, we have measured the climate impact of countless companies, projects and products worldwide. We have screened USD 50 bn+ of investments for their climate impact and we have developed 270+ projects in renewables, energy efficiency, forestry, agriculture, industry and households. Through our efforts, 50 million tonnes of CO₂ have been saved, almost as much as the annual CO₂ emissions of the country of Portugal. We have enabled the production of 35,000 GWh of renewable energy (more than the annual electricity consumption of the country of Denmark), and mobilised over USD 6 bn for clean energy investments in emerging markets. In total, our projects have helped create almost 20,000 jobs in developing countries and we saved 17,000+ hectares of forest from deforestation, about the size of 24,000 soccer pitches.

“south pole group is an important partner for CDP, we collaborate among others on climate impact assessment of investment portfolios. We are happy to add south pole group’s travel carbon foot printing expertise paired with high quality certified carbon credits as a further benefit to the CDP DACH Climate Leadership Award Conference and Ceremony 2014.”

Susan Dreyer Director DACH Region, CDP

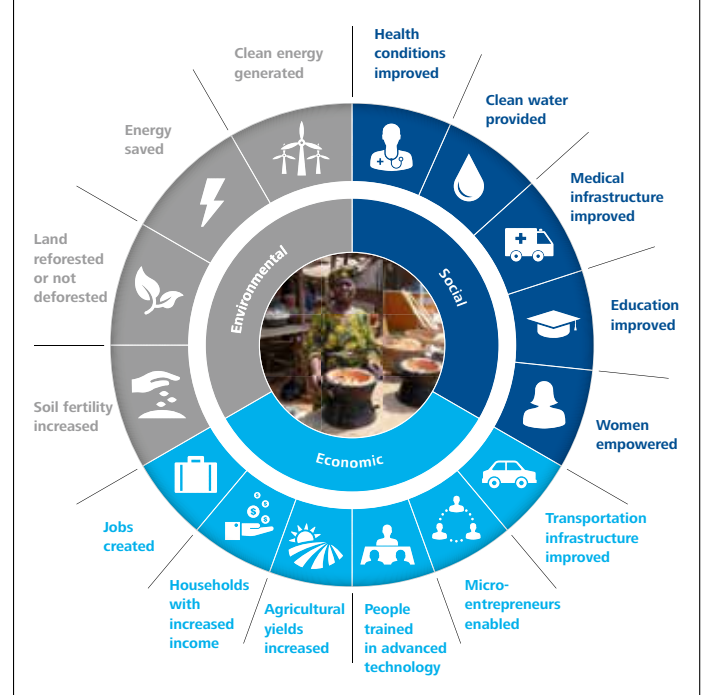

In a nutshell

We are the ideal partner that helps you build business value while creating a sustainable society and economy that positively impact our climate, ecosystems and communities.

Added value

We help you grow your business with ground-breaking solutions for dealing with the environment and the needs of society.

Types of impacts brought into effect by south pole group
