

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole Group is an energetic, global company offering comprehensive sustainability solutions and services. With offices spanning all six continents, we strive to create a sustainable society and economy that positively impacts our climate, ecosystems and communities. With our solutions we inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Renewable Energy Expert (100%) based in Amsterdam, London or Stockholm

In this role you will participate in the design of climate strategies linked to Renewable Energy (RE) and focus on identifying, sourcing and developing a portfolio of direct RE supply and potential investments. You will lead RE-related engagements and support our Key Account Management team in business development in the sector. This challenging position requires an enthusiastic and dynamic sustainability professional with relevant experience in consultancy, project management and development of corporate renewable energy strategies.

Tasks and responsibilities

- Play a leading role in shaping South Pole's strategy for RE services outside of Renewable Energy Certificates (RECs) and identify the needed resources
- Create relevant RE products and consulting services which respond to new trends and needs outside RECs
- Source and develop a portfolio of direct RE supply and potential investments
- Understand market trends and clients' needs and structure a consistent approach to communicate to the Key Account Management team
- Manage and coordinate proposals for opportunities on all RE services
- Supervise the implementation of mandates within RE services, providing guidance to project managers and ensuring quality of the deliverables
- Lead a small team of experts

Your profile

- Minimum a Master's degree, ideally in Environmental Sciences, RE, Energy Policy or related disciplines
- At least 7 years of relevant work experience in consultancy or other client-service based positions
- Experience in the development of corporate renewable energy strategies
- Knowledge of the energy sector in general and green electricity sector in particular, including regulatory development, energy economics, electricity generation and project development
- Familiarity with financial analysis, Power Purchase Agreements (PPAs), RE investments, renewable energy offtake agreements and business models
- Be familiar with socio-economic and environmental dimensions of RE projects
- Commercial skills and good business sense to be able to identify and seize opportunities in a challenging and competitive market environment
- Demonstrated ability to work under deadline, with multidisciplinary teams as well as independently
- Excellent communication and problem solving skills

- Experience in team management, ideally within an international and multicultural context
- Advanced skills in MS Word, Excel and PowerPoint are essential
- Excellent oral and written command of English
- Willingness to travel
- National, or holder of a valid required work visa in host country

We offer

- Excellent team spirit
- Be part of a growing and multicultural company
- Work autonomously as well as within a large and international team of sustainability passionate professionals
- A clear career development potential as a key part of the Consultancy & Services team

Please apply
