

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. With offices spanning all six continents, we strive to create a sustainable society and economy that positively impacts our climate, ecosystems and communities. With our solutions we inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Senior Research Consultant, Carbon Pricing and Climate Policy (100%) based in London, United Kingdom

In this role you will be managing and implementing public advisory engagements related to carbon pricing and climate policy from sourcing to implementation. Clients you will work with include multilateral development banks, research networks and international development organisations. In addition, you will contribute to South Pole's strategy on the just transition of the energy workforce. This challenging position requires an enthusiastic and dynamic professional with relevant experience in research and policy analysis. If you have proven research expertise in the transition of the workforce, and carbon pricing, as well as in-depth know-how in international climate policy and/or green industrial policy, then we are looking for you! The closing date for applications is 22 October 2018.

Tasks and responsibilities

- Lead research advisory engagements related to carbon pricing and climate policy, including:
 - Design, plan and implement proposals
 - Lead the technical implementation of research advisory projects
 - Create and oversee the research network for advisory projects
 - Manage project teams for specific advisory projects, including SP consultants in all six continents and external partners, ensuring high quality outputs and cost efficiency
- Serve as a knowledge expert for the company in the fields of carbon pricing, energy workforce transition, climate policy and green industrial policy
- Maintain an excellent relationship with public advisory clients and strategic research institutes
- Acquire new research partners and develop new strategic partnerships
- Contribute to the company's carbon pricing and climate policy advisory practice

Your profile

- Minimum a Master's degree, and ideally a Postgraduate degree, in Environmental Sciences, Climate Policy, Economics or related disciplines
- At least 5-7 years of relevant work experience in research advisory and research consultancy
- Proven expertise in carbon pricing, just transition of the energy workforce, and green industrial policy
- Track record in researching and advising on climate change mitigation projects, programs or instruments across sectors and technologies would be an asset
- Experience in team management and ability to work autonomously, ideally within an international and multicultural

context

- Established network with climate/environmental research networks, development agencies, governments and other public or private stakeholders
- Advanced skills in MS Word, Excel and PowerPoint are essential
- Excellent oral and written command of English. Proficiency in other languages will be considered an advantage

We offer

-
- Excellent team spirit
- Work in a growing multinational company with a real commitment towards sustainability and the fight against climate change
- A unique opportunity to be at the forefront of international climate change developments
- Work autonomously as well as within a large and international team of passionate climate and sustainability professionals
- Salary of £45,000 - £50,000
- Competitive company bonus
