

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. With offices spanning all six continents, we strive to create a sustainable society and economy that positively impacts our climate, ecosystems and communities. With our solutions we inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Cleantech Investment Analyst, fixed term (80-100%) Zurich, Switzerland

To support our team, we are looking for a Junior Analyst in their early career that has a solid background in engineering or natural sciences. South Pole jointly manages the agency of the Technology Fund (www.technologyfund.ch) with Emerald Technology ventures on behalf of the Swiss Federal Office for the Environment (FOEN). We are continuously growing and monitoring a CHF 500 Mio. investment portfolio of companies that mitigate GHG emissions with innovative technologies in various sectors and markets. To further strengthen our team in Zurich, we are currently looking to recruit a highly motivated and dedicated Analyst. The contract duration is 12 months with chance for a full-time employment contract.

Tasks and responsibilities

- Perform assessments of potential portfolio companies in collaboration with a team member and the respective company management and its customers and partners
- Develop an in depth understanding of the relevant technology, business and financial model, markets and greenhouse gas impacts of a potential portfolio company
- Identify and investigate potential technical and financial investment risks
- Report the findings and recommendations
- Relevant industries are: Building industry, energy production, energy efficiency, automation, IoT, ICT, agriculture, electronic industry and others

Your profile

- Outstanding German writing skills are essential (French and/or Italian are a plus)
- 1+ years relevant professional experience
- Engineering or Natural Sciences university degree (or equivalent) with high curiosity for innovative technologies and the respective markets
- Swiss national, or holder of a valid work permit
- Knowledge of GHG-accounting, carbon foot printing or Life Cycle Analysis
- Good IT skills (Excel/spreadsheet, Word/text processing), advanced IT skills are a plus

We offer

- Work in a growing global company with a real commitment to sustainability and fighting climate change
- Excellent team spirit, work with a dedicated and enthusiastic international team around the globe
- High level of responsibility and independent working culture
- Chance to expand the tasks and potentially a full-time employment contract
