

RENEWABLE ENERGY PROCUREMENT

South Pole is your one-stop shop to customised sustainable power solutions

Get started

Renewable Energy Procurement – workshop

To navigate the *renewable energy maze* and identify your ideal solution, first build your in-house knowledge to ensure informed *decision making*.

South Pole, together with PPA expert **Pexapark**, offers a bespoke workshop on **Renewable Energy Procurement**. Through this workshop, you will understand the various renewable sourcing options along with their **benefits, risks and challenges**.

The workshop focuses on:

- green tariffs
- certificates, such as GOs, I-RECs or RECs
- corporate PPAs (physical and virtual)
- on-site renewables
- energy trading and risk management (the basics)

and sets the basis for the development of a global renewable energy strategy definition and execution plan.

A global trend

The corporate demand for the procurement of renewable energy (RE) is growing. However, the multiple solutions at hand entail significant differences, which need to be considered when evaluating your best strategy for sustainable power consumption.

Strategy development and implementation

As an independent consultant, South Pole develops and implements your short-term and long-term renewable energy sourcing strategy.

- **We define:**
 - your global strategy for your interim and long-term goals; and
 - the best mechanism for each of your facilities to reach your global targets.
- **We execute:**
 - the agreed strategy by using our expertise and our global network of REC project owners, PPA counterparties and developers.
- **We monitor and report:**
 - the renewable energy procurement through our proprietary project management software 'Antarctica'.

South Pole's approach to your clean energy future

Challenges	Opportunities
- Your stakeholders demand a sustainability strategy, including commitments towards RE100, setting Science-Based Targets (SBTs) and adopting CSR targets. - Your local electricity market is volatile and you face the risk of increasing power prices. - Understanding power price forecasts is time intensive and managing wholesale market risks requires a high-level of expertise.	By defining a renewable energy sourcing strategy you can tackle these challenges. At the same time: - ensure long-term electricity cost affordability and improved price visibility reduce carbon emissions and meet renewables targets - demonstrate leadership on climate change to internal and external stakeholders.

We will assess your current consumption and consider all different solutions when defining your short- and long-term renewable energy procurement strategy:

Our PPA Partner, Pexapark

The renewable PPA experts that help monitor, manage and optimise power sales, revenues, and risks.

Pexapark is a Swiss fintech that has advised on over 2.2 GW in PPA transactions during 2018 and offers an all-in-one solution including: PPA academies, advisory services, transaction management and risk monitoring via its PEXA@connect platform.
