

Climate, Carbon & Energy Solutions by South Pole Australia

A proud track record in Australia

South Pole is a leading provider of global sustainability financing solutions and services, with over 300 experts in 18 global offices.

In Australia, our local knowledge and understanding is backed by this global expertise, allowing us to offer products and services tailored to support all levels of sustainability ambition.

We help our clients assess their climate risks and opportunities, measure and reduce their environmental impact, source renewable energy, and support sustainability projects that are transforming lives around the world.

South Pole Australia's dedicated team of sustainability experts, climate marketing specialists, and skilled carbon market consultants are helping Australian businesses, industry groups and governments unlock the potential of their sustainability ambitions and drive Climate Action for All.

South Pole Australia offers bespoke climate, carbon and energy solutions tailored to the local market, including measuring and offsetting greenhouse gas emissions, designing emissions management plans, and energy efficiency and renewable energy provision. We also provide market-leading consultancy on climate-related risks and opportunities for investors and corporates.

Our team specialises in products and services including:

- Carbon offsets
- Renewable Energy Certificates (RECs)
- Carbon and energy market advisory
- Greenhouse gas emission accounting, in line with the National Carbon Offsetting Standard (NCOS)
- Task Force on Climate-related Disclosures (TCFD)
- Science Based Targets (SBT)
- Sustainability marketing & communications support

Our impact so far

170+ million

tCO₂e of reduced emissions
around 40% of the national annual GHG emissions of Australia

140,000+

GWh renewable energy generated
around half of the national annual electricity consumption of Australia

100,000

jobs created in developing countries

roughly equivalent to the total number of people at the MCG on AFL Grand Final day

20+ million

lives positively impacted

around 80% of the total population of Australia

700+ projects developed

in renewables, forestry, agriculture, industry and households

20,000+

km² of forests saved from deforestation
almost one-third of the total area of Tasmania

55,000+

km² of land protected or restored
roughly equivalent to 10 times the total size of the island of Bali

\$ 15+ billion

clean energy investments mobilised

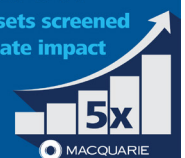

more than 5 times the annual new investments in renewable energy in New Zealand

\$ 2+ trillion

investments and assets screened regarding their climate impact

is more than 5 times the value of assets under management by Macquarie Group
