

We are hiring

Would you like to be part of our dynamic, global and growing team? South Pole is an energetic, global company offering comprehensive sustainability solutions and services. South Pole acts today 'for a better tomorrow'. With offices spanning all six continents, we accelerate the transition to a climate-smart society. Our vision is "Climate Action for All": We inspire and enable our customers to create value from sustainability-related activities.

To further promote environmentally and socially responsible practices, we are currently looking to recruit a highly motivated and dedicated

Project Manager (100%) based in Bangkok, Thailand

As part of the Projects and Development team, you will play a leading role in contributing to the carbon markets of tomorrow by implementing and managing the emission reduction projects and developing direct client relationship within Thailand and Southeast Asia. This is a fast growing and dynamic business area with regional market potential, are you ready for the challenge?

Tasks and responsibilities

- Responsible for the implementation and management of the emission reduction projects in Asia Pacific and globally which includes:
 - Drafting project design documents
 - Baseline determination and surveys
 - Advanced monitoring, reporting and verification (MRV) design
 - Support and implementation
 - Validation, verification and issuance support under different standards (CDM, VERRA, GS4GG and others if relevant) among other local and international carbon schemes
- Leading, co-drafting and supporting proposal preparation and tender submissions for project based consultancy opportunities in SEA
- Represent South Pole towards external stakeholders during business development processes and maintain good relationships with project owners, clients, DOEs (auditors) and other counterparts
- Ensure that project documents are drafted in a high quality manner
- Conduct site visits and travel to project locations whenever needed
- Take the lead in market research on emerging new topics in the sustainability sector and project sourcing

Your profile

- University degree in Renewable Energy, Environmental Science, Engineering or any related field
- Experience in on-grid or off-grid based renewable energy, e.g solar, wind, biomass, biogas. Familiarity with wastewater treatment system as well as LFG system is a must
- Minimum 5 years of project development experience
- Good understanding of CDM, VERRA, GS4GG including other carbon standards
- Good understanding of climate change topic, GHG accounting project, carbon projects, carbon footprint, community based project and renewable energy development is essential
- Excellent interpersonal and communication skills both in English and in Thailand

- Well established drafting skills
- Decision making ability, as well as able to prioritise tasks in order to meet deadlines
- Willingness to travel

We offer

- Work in a growing global profit for purpose company with a real commitment to sustainability and fighting climate change
- Excellent team spirit, work within a large and international team of sustainability passionate professionals
- The opportunity to work with professional experts all around the world
