

We are hiring

South Pole is the leading provider of sustainability solutions across the globe. We see Europe on the knife-edge of a high sustainable transition in complete contrast to federal policy. South Pole has operated in Europe since its founding in 2006 and since our inception we have created a youthful, energetic and passionate crew of climate leaders that have had great success in landing new mandates across many industries.

We are very excited to announce that we are looking for an inspiring and passionate

Corporate Sustainability Consultant (100%) based in Amsterdam, the Netherlands

to unleash the full power of our existing European team and continue to build on our market successes for the years ahead. As a Corporate Sustainability Consultant, you will focus on the delivery of high quality consultancy advice on climate change mitigation solutions to the corporate sector for international clients. You will also be responsible for the management of small project teams. In addition, you will also lead the development of proposals and participate in business development activities and new service creation. This is a fast growing and dynamic business area with global market potential.

Tasks and responsibilities

- Implement and manage consulting mandate projects for international clients
- Plan consulting mandates with necessary know-how and skill set to ensure the most efficient and highest quality implementation
- Develop proposals with the responsible Key Account Managers and senior consulting staff
- Interact with and build relationships with clients and manage the delivery of corporate consulting mandates on corporate climate risks and opportunities
- Support senior consulting staff and our Key Account Management team in business development in the corporate sector as well as the development of thought leadership, services and marketing materials, to develop our corporate offerings further
- Interact closely with our international team of internal consultants
- Topics of engagement may include: GHG accounting and disclosure, climate change mitigation, Science Based Targets (SBTs), Risk assessment and TCFD, materiality assessment, energy efficiency, Life Cycle Analysis (LCA), Sustainable Development Goals (SDGs), renewable energy strategy, etc.

Your profile

- A university degree, ideally in Environmental Sciences, Environmental Engineering, Energy Engineering, Economics or sustainability-related disciplines
- At least 4 years of work experience in the corporate sector
- Sound understanding of environmental sustainability challenges in multinational companies
- Specific consultancy experience in: sustainability and corporate risks; consultancy for corporate clients, particularly in topics related to GHG accounting, scope three emissions and agricultural emissions; developing climate change solutions
- Commercial skills and good business sense to be able to identify and seize opportunities in a challenging and competitive market environment

- Practical experience in sustainability strategy, GHG management, adaptation and/or change management is desirable
- Excellent oral and written command of English
- Knowledge of any other European languages, particularly Dutch, is considered advantageous

We offer

- Work in a growing global profit for purpose company with a real commitment to sustainability and fighting climate change
- Excellent team spirit, work within a large and international team of sustainability passionate professionals
- The opportunity to work with professional experts all around the world

Please apply
