

Carbon Farming Spatial Analyst

Job Description

T +61 2 9356 3600

F +61 2 8221 9895

Suite B Level 2 140 William St

The Company

Climate Friendly has offices in Sydney, Melbourne and The Hague and provides innovative climate change solutions to leading organisations around the globe.

Climate Friendly is an experienced and innovative developer of projects under the Australian Government's Carbon Farming Initiative (CFI), drawing on the expertise of our global partner South Pole Carbon, the world's largest developer of carbon finance projects.

Working with landowners and businesses, we have successfully developed projects across four project types including avoided deforestation, forest regeneration, savannah burning and waste diversion, making Climate Friendly one of the most diversified project originators in Australia. Supported by funding from the Australian Government, Climate Friendly has also developed a website that shares information on carbon farming called mycarbonfarming. More information is at www.mycarbonfarming.com.au.

The Role

Carbon Farming Spatial Analyst

- Manage and implement the Australian Projects GIS Program including ensuring KPIs within the program are met, providing the first point of call for all client managers, presenting GIS findings to project auditors and assistance with GIS tasks including stratification.
- Lead the GIS program to ensure effective task allocation and efficient task completion especially for project due diligence.
- Management of GIS team members.
- Assistance with urgent forest cover checks and stratification as required.
- Primary contact for discussions with the auditor on GIS matters.

Climate Friendly Pty Ltd

Suite B, Level 2, 140 William St, East Sydney, NSW, 2011, Australia

T +61 2 9356 3600 F +61 2 8221 9895

ABN: 65 107 201 025

- Due diligence carbon assessment for new projects.
- Preferably Sydney-based, but willing to consider other locations
- 12 month contract
- Reporting to the Manager Australian Projects.
- Competitive package.

You

This is a challenging role that would suit a person with a combination of good people management and spatial analysis skills. You possess relevant tertiary qualifications, preferably in forestry, GIS, science or engineering and have at least three years of professional work experience including working in the carbon offset project cycle either as a project developer, auditor, Regulator or consultant.

You have expertise in the forestry and land use sector including direct experience with ArcGIS and QGIS. In return you will be rewarded both financially and professionally. You will have the opportunity to work for a values-based company that has been operating successfully for twelve years, inspiring our customers to take action on climate change, whilst promoting a fun and flexible environment that encourages ideas, collaboration and high performance.

Interested parties should provide their CV to Josh Harris, Manager Australian Projects, by 26
